CHITOSAM™ 100

ChitoSAM™ 100 is a high performance 100% chitosan hemostatic dressing designed to stop lethal bleeding fast. It is easy to use, extremely effective, and safe. ChitoSAM™ 100 works independently of the body's normal clotting processes.

HOW IT WORKS

Unlike most hemostatic dressings, ChitoSAM™ 100 is made of non-woven, 100% chitosan. The hemostatic performance is equivalent compared to products impregnated or coated with chitosan hemostatic agents.

HISTORY OF USE

Chitosan has an extensive history of use in emergency, military, and retail first-aid with no reported problems. Chitosan has been successfully used in human cardiac surgery with no adverse events.¹ Polysaccharides have a substantial history of internal use in the human body to stop bleeding.

From the makers of the SAM® Splint, SAM® Pelvic Sling II, SAM® Junctional Tourniquet, SAM® Soft Shell Splint, SAM® Chest Seal, ChitoSAM™ & Blist-O-Ban™. Headquartered in Wilsonville, OR, our products are distributed globally in over 60 countries.

"We exist to measurably improve pre-hospital patient care through innovative solutions to the toughest challenges in the field"
