## EASY Collar | Cervical Collar

2 versions: Mini | Adult

### AEROresc® - EASY Collar | Cervical Collar

The AEROresc® - EASY Collar is a size adjustable cervical collar intended for safe immobilization of the cervical spine. It reliably restricts the freedom of movement of the cervical spine and takes over its stabilizing function.

The fine grid of both models assures easy and individual size adjustment even beyond standard sizes. Due to its self-raising chin support the cervical collar could be given a flat design and can easily be stored with minimum space requirements.

With only 2 models for any patient type (from infant up to tall adults) you are perfectly equipped for emergencies.

EASY Collar - Highest stability at maximum wearing comfort.

### Persuasive Advantages

- reliable restriction of freedom of movement
- lock-mechanism assures high stability
- symmetrical size adjustment due to guide rail
- easy and quick size selection due to finger technique
- self-raising anatomical chin support
- spacious access front and rearside for pulse control, airway management, view at larynx, palpation
- left and right-side fastening hook for mounting of O<sub>2</sub> tubing
- radioluscent, suitable for CT & MRI
- space saving storage due to flat design
- high quality material - hypallergenic, latex- and PHT-free
- instruction for use printed onto product - always at hand

AEROresc® - EASY Collar Mini

AEROresc® - EASY Collar Adult
